## DATI TECNICI - TECHNICAL DATA

Nella versione XE-16 gli assi y e z sono motorizzati con viti e chiocciola a ricircolo di sfere montati su guide a pattini.  
In the XE-16 model the axes y and z are motorized with brushless motors with ballbushing nut and screws, assembled on sliding block guides.

Per esigenze specifiche modifichiamo le macchine secondo le vostre richieste.  
For special needs we modify our machines as per requirements.  
A richiesta è possibile l'allestimento con tamponi indipendenti  
As per your request it's possible to use independent pads

Le INKPRINT XP-XE16 sono il risultato di una costante ricerca nel campo della tampografia. Create per soddisfare le esigenze di stampa su superfici di medie-grandi dimensioni da 1 a 5 colori.

La robusta struttura, il gruppo porta calamaio con regolazione micrometrica (x, y e rotazione di  $\pm 5^\circ$ ), il calamaio ermetico con anello in ceramica, il supporto porta tampone regolabile anche in altezza, la mensola motorizzata e nella versione XE la possibilità di gestire tutti i movimenti degli assi motorizzati (brushless) direttamente dal touch screen permettono una veloce e precisa messa a punto della macchina. Le INKPRINT XP-XE16 hanno inoltre la possibilità di montare indistintamente diversi tipi di alimentatori o tavole rotanti e possono essere completate con diversi tipi di optional come: discesa dei tamponi indipendente, generatore di aria calda tipo Hot Wind 200 o Masterflow, pulizia automatica dei tamponi ad inserimento programmabile (patentata), sistemi integrati per il pretrattamento dei materiali tipo corona o fiammatura a gas, jonizzatori, cappe ad essiccazione UV o sistemi per il carico e lo scarico automatico dei pezzi.

*Inkprint model XP16 and XE16 are the result of a constant study in the pad-printing field. Manufactured to satisfy all printing needs on medium and large surfaces from 1 to 5 colors. The sturdy structure, the holding inkcup group with micrometrical regulation (x, y and  $\pm 5^\circ$  rotation), the hermetically sealed inkcup, the holding pad group adjustable even in the height, the motorized table and in the model XE the possibility to adjust all the movements of the motorized axis (brushless) directly from the touch screen, allow a fast set up and changeover of the machine. INKPRINT XP16 and INKPRINT XE16 have also the possibility to have any type of feeder or rotating table and can be finished with different optionals as: independent pad movement, hot air dryer type hot wind 200 or masterflow, automatic pad cleaning device with programmable starting (patented), pre-treatment system as corona or flaming device, ionizer, uv dryer hook and automatic loading and unloading systems of the pieces.*
